INQUIRIES TO: Ken Rainis: k.rainis@me.com

What's New:
 - Jouef Hornby Locomotive
 - L34. Weaver Locomotive
 - L-26 Tinplate Rolling Stock
 - L31 Lionel Illuminated Pullman cars
- O-11: On30 Scratch-built ENGINES, CARS & STRUCTURES!!!

Image Database: Email Ken Rainis to receive highest jpg images of available items.

Box Number	Quantity	Description	Manufacturer	IMAGE DATABASE
L = Lionel H = HO Gauge E = Evaluated Locomotives On30 = O scale T = Transformers				Images for listed items are available separately. Contact Ken Rainis by email.
E	1	LOCOMOTIVES & Tenders EVALUATED (t to 5 - poor to exceptional) * Pulling Power - (flat radius oval) * Smooth Running * Noise * Lights Work * Couplers * Run Test	Manufacturer & Scale	IMAGE DATABASE Images for listed items are available separately. Contact Ken Rainis by email.

High-Res photos available. Out-of-area shipments available (at cost). Please inquire.

On30 is a popular scale in model railroading that offers a unique blend of realism and space-saving features. Here's a technical description:

*Scale: 1:48 scale, the same as standard O Scale. This means that 1 inch in the model represents 48 inches (4 feet) in real life.

*Track Gauge: 30 inches (762 mm) in real life, represented by HO scale track (16.5 mm) in On30. This allows for the use of readily available HO scale track and rolling stock.

O-n-30 GUAGE

Items are photographed below. Refer to BOX NUMBER. Out-of-area shipments available (at cost). Please inquire.

On30 is a popular scale in model railroading that offers a unique blend of realism and space-saving features. Here's a technical description:
 •Scale: 1:48 scale, the same as standard O Scale. This means that 1 inch in the model represents 48 inches (4 feet) in real life.
 •Track Gauge: 30 inches (762 mm) in real life, represented by HO scale track (16.5 mm) in On30. This allows for the use of readily available HO scale track and rolling stock.

MISCL O-Scale ROLLING STOCK modeled after Aspen & Western Railroad (1886)					
Scratch-built Aspen & Western Railroad was a short-lived railroad company in Colorado. It was formed in 1886 with the goal of connecting the Denver & Rio Grande's narrow-gauge Aspen Branch with nearby coal deposits.

Jouef HO Trains Items are photographed below. REFER TO 'JOUEF'. Out-of-area shipments available (at cost). Please inquire.

Jouef	HO Gauge	Rolling Stock	Jouef are a long established toy firm in France. In the early 1950's HO scale production started and later included the ubiquitous 0-4-0 tank in both clockwork and electric, a small diesel loco and various primitive wagons and short coaches in HO in both metal and plastic.
